Re: Colour marks of pistons

Dear Sirs,

The colour marks for the piston weights of the R 50/2 model have been changed as follows:

342 to 347 g grey
346 to 351 g brown
350 to 355 g green.

The respective colour dot is applied onto the piston crown.

Moreover we wish to inform you that the pistons of the models R 27, R50, R50/2, R 60/2 and R 69S will be provided with standardized piston pins of the size D 20 x 12 x 56, similar to DIN 73 125 L.

Very truly yours,

BAYERISCHE MOTOREN WERKE
Aktiengesellschaft
