Re: Improved centrifugal advance unit for BMW R 27

We found out that springs of the  
centrifugal advance unit for the R 27 motorcycle  
broke in some cases.

All centrifugal advance units, 80 30 147, in store, should  
therefore immediately be handed over to the nearest BOSCH  
agency who will arrange for the transformation according to  
the

BOSCH bulletin VDT-BME 121/53 ZV of 3/7/62.

In case of need you should only install the green-point mar-  
ked centrifugal advance units, transformed and at the same  
time improved (reinforced spring) by the Bosch firm.

Yours very truly
