Re: Helical gear for the speedometer drive

Commencing with frame numbers

640 039	(R 50)
627 956	(R 60)
660 144	(R 69 S)
384 115	(R 27)

a new helical gear with a built-in oil return worm and an additional ventilating bore,

Part No. 10 30 165,

has become a standard equipment for the speedometer drive.

An occasionally occurring oil leakage at the entry of the speedometer shaft into the transmission will thus be avoided.

The exchangeability of the new helical gear is ensured.

Very truly yours,
BAYERISCHE MOTOREN WERKE
