Further advantages of being a BMW rider.

# An entire range of technical accessories.

**To make sure you don't take along less than you need. The BMW range of cases and bags.**

The perfect touring case for city, overland and touring use. A case which you can paint in your favorite color.

Now you can take along your baggage in a case that really matches your motorcycle, because the removable top of this touring case can be painted in every standard-production color BMW has to offer. And what excels by its exclusive design outside, will convince you inside by its spaciousness (1.12 cu ft/32 ltr) and absolute convenience.

1

With its epoxy-finish aluminium frame and top-quality synthetic material, the BMW case is particularly stable. The silicon seal keeps out dust and water even in adverse conditions. Thanks to its corrosion-proof lock system, the case can be fitted and locked with perfect ease (various lock positions) (1).

Left and right case support.

Available in black or chrome-plating for all BMW models. (2)

2

For additional luggage:

The luggage rack in conjunction with the case support or the luggage support for all BMW models with the S-type saddle. Available in black or chrome-plated. (2)

BMW vario tank bag.

A versatile tank rucksack that keeps everything where it should be. Systematically.

Just open the zipper to increase the capacity of the BMW vario rucksack from 0.3 cu ft/8.5 ltr to 1.12 cu ft/32 ltr. Or close the zipper to make the rucksack smaller. This highly versatile system also offers a number of other practical benefits: see-through flap for road maps, infinitely adjustable carrier straps. The BMW vario rucksack is made of leather fiber with the upper section made of tear-proof, hard-wearing synthetic fiber (3).

BMW multivario tank bag.

The BMW multivario is always as big as you need. And as small. Just pull the zipper to increase the capacity of the BMW multivario from 0.33 cu ft/9.5 ltr to 1.16 cu ft/33 ltr.

6

And to obtain a practical tank bag, just take out the middle section. Because the BMW multivar can be taken to pieces like a building-brick system. Magnets at the bottom combined with carrier straps to be attached to the tank joint keep the multivar securely in position. It is made of the same material as the BMW vario (4).

**New: case support, luggage rack and left-side touring case for the BMW R 80 G/S and R 80 ST.**

A specially developed case support and luggage rack are now available for the BMW R 80 G/S and ST with the high-rise exhaust pipe. So now the BMW touring case can be fitted on both sides of these models, too. For reasons of design symmetry, the left-side case is a bit flatter. But both cases together provide more than 1.75 cu ft/50 ltr capacity (5).

**BMW Inside bag for the BMW touring case.**

With this inside bag you can carry all kinds of things. On your motorcycle and on foot. An elegant traveling bag for maximum mobility (6).

Increase your riding dynamism by even better streamlining.

Windscreen for fatigue-free riding in the upright position.

Additional headlight, long-range and wide beam.

Steering damper.

Greater riding comfort thanks to perfect stabilization of the handlebar both at high speeds and in rugged terrain.

Dual disc brake.

Additional braking power increases your riding safety.

BMW Integral Cockpit.

A cockpit designed through exhaustive wind tunnel tests to maximize the superior roadability of BMW motorcycles. Protected from strong winds around the arms and body, the rider becomes even more efficient in handling his machine. As a result, better streamlining means greater riding dynamism and minimum fatigue.

BMW Touring Integral Cockpit.

This further development of the Integral Cockpit is ideal for the touring rider. The integrated hand protection elements and the adjustable windscreen guarantee a perfect fit for each rider, depending on his size and seating position. Air flows into the cockpit through the integrated air ducts on the left and right side. The air volume and flow direction are infinitely adjustable. Extra-large, rigidly installed and lockable boxes located below the ventilation ducts offer additional storage space.

BMW S-Cockpit.

The ideal cockpit with perfect streamlining for the sporty rider.

Cockpit fairing for the BMW R 45/R 65.

This sporty cockpit fairing made of glass-fiber-reinforced polyester not only looks good, but also keeps out dust and splash water. Available in all standard colors or with primer only.

The BMW Integral, Touring Integral, and S-Cockpit can be fitted subsequently on all /7 models.

Cylinder protection bars, black or chrome-plated.

Stainless-steel exhaust system protector.

Protects the heels and soles of your boots and the exhaust system. Available for all /6/7 models.

Rear splashguard, black or white.

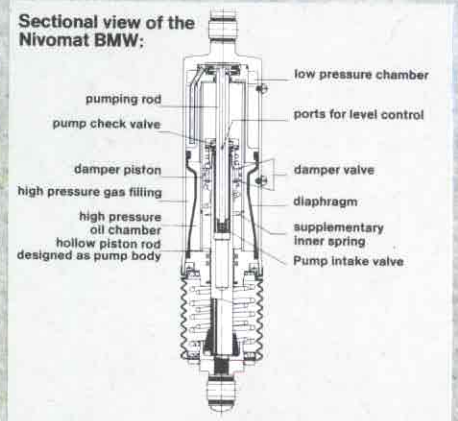

**Now you can stick to your normal style of riding no matter what load you are carrying; Introducing the BMW self-leveling spring strut.**

BMW proudly announces a revolutionary technical development designed to abolish an old motorcycle problem. To date, varying loads have had diverse effects on a motorcycle's handling and riding characteristics – a common disadvantage that applies to all motorcycles. But now BMW is the world's first motorcycle manufacturer to provide absolute riding stability.

We have achieved this with the BMW self-leveling spring strut.

A spring strut in which the suspension and wheel damping characteristics are adjusted automatically to the load you are carrying. As a result, you do not have to change your style of riding according to the load on your motorcycle: The way you ride alone today will be the way you ride tomorrow with a passenger, heavy luggage or both.

The self-leveling spring strut keeps spring travel short and maintains constant ground clearance except on rough tracks where it lifts up the machine slightly in order to increase riding comfort and keep the headlight in the right position.

**Hazard warning flashers, the essential safety system.**

**Voltmeter for checking the electrics at a glance.**

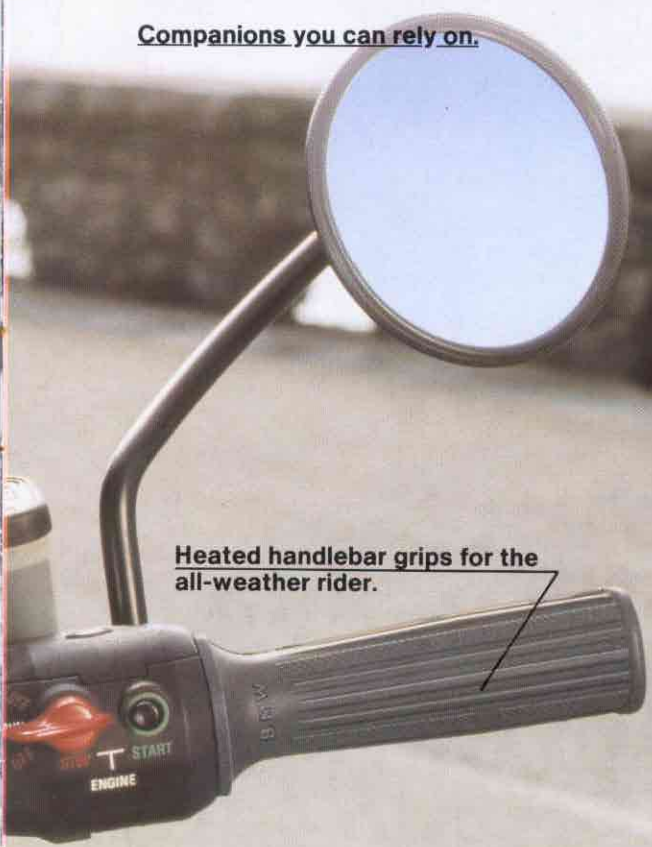

**Touring handlebar for comfortable and fatigue-free riding. Short rear-view mirror to match, available in black or with chrome-plating.**

**Quartz clock for exact timing.**

## Service and safety on the road.

Companions you can rely on.

Heated handlebar grips for the all-weather rider.

### Super toolkit.

12 high-quality, chrome-plated tools in addition to the standard units: inter alia, water pump tongs, set of spanners, side cutter, feeler gauge, contact file, tire pressure tester, and ignition timing test lamp. (1)

Paint sprays and sticks for touching up minor scratches. (1)

Tire service set for repairing tires quickly and easily. (1)

### Inspection set.

Genuine BMW Parts are the best guarantee for carefree riding. (1)

Oil change set, contains everything you need to change the oil (except oil itself). (1)

### Bulb set.

The right bulb for each motorcycle and purpose. Halogen or bilux. A safety reserve that may always come in very handy. (2)

Socket for connecting a multi-purpose lamp, intercom system, etc. (2)

Multi-purpose lamp with 12 V halogen reflector. Perfect as a searchlight and for reading maps thanks to its 3-meter cable. (2)

### First-aid kit.

This kit is made according to German Industrial Standard DIN 13166. In this practical and weather-proof box you will find a pair of multi-purpose scissors, gauze, adhesive bandage and first-aid instructions. (2)

**The classic BMW motorcase.  
The classical luggage compartment  
for your BMW.**

The BMW motorcase is really popular for many reasons. One of which is its ample 1.05 cu ft/30 ltr capacity. Two other merits are the robust shell made of polypropylene and the extremely stable double-section aluminum profile with its integral silicon seal. A further feature is the new, theft-proof locking system for the case and case support. And the unmistakable design of the BMW motorcase is another benefit not to be forgotten: The BMW motorcase is available in black or white. Thanks to its metal hinges and removable cover support, the cover of the BMW motorcase can be taken off

whenever necessary (1).

**BMW case support and luggage rack.**

The case support, luggage rack and luggage support for all BMW motorcycles are available in black or chrome-plated (2).

**BMW Inside bag for motorcase.**

To make you as mobile on two feet as you are on two wheels (3).

**Genuine BMW Motorcycle Accessories.** The individual way of rounding off a superior motorcycle concept. Developed and tested according to BMW's uncompromising quality standards. The reliable address for Genuine BMW Motorcycle Accessories: Your BMW Dealer.

Please observe national specifications and requirements.
