

Luftmeister Incorporated offers a pair of auxiliary fuel tanks with colors and pinstriping to match BMW motorcycles. The dual tanks are made of aluminum and filled with anti-slush explosion-safe material and fit snugly just below the rider's saddle. Installation is simple — just one bolt and nut serves to fasten the tanks securely to the frame. Tanks feature individual petcocks and are said to offer an average increase of 100 miles to BMW cruising range. Luftmeister, Inc., 580 W. 184th Street, Gardena, California 90248.
